

CASCADE™ CHRONIC DIALYSIS CATHETERS AND KITS

- Durable radiopaque silicone material.
- Low profile polyester cuff allows for secure anchoring.
- Rotating suture wings for secure external anchoring.
- Staggered tip design allows for optimal flow rates, and less than 5% recirculation.

CASCADE™ DOUBLE LUMEN CHRONIC CATHETERS are intended for long term implantation for dialysis and apheresis therapy. Cascade™ catheters use engineered medical grade silicone, specially formulated for patient comfort and flow performance, while also maintaining a high level of durability. The 13.5F Cascade™ Chronic Dialysis Catheters are designed for optimal blood flow and minimal venous back pressure.
